

RAIN HAS DONE GOOD

LOCAL EXPERTS SAY THAT THE GROUND IS IN FINE CONDITION FOR PLOUGHING

There is great rejoicing among the fruitgrowers and ranchers all throughout the Valley over the welcome rainstorm that spread 4.06 inches of life-giving water on the thirsty ground. H. E. Bartlett, 101 S. Brand boulevard, who has a lemon ranch, out near Pacoima, said: "The rainfall has broken all records for September and October. During the time that records have been kept in Southern California there has been nothing like this rainfall at this time of the year. That would take in a period of fifty years. I think there is little fear of this rainfall being followed by frost."

"I went out Tuesday to my ranch and went over the ground, trying it with a spade. Everywhere I found that the ground had been penetrated and that where the ground had been irrigated the rain had completely saturated the soil. It is likely that I may have to give my lemon trees one more irrigation. Everything looks well. The rain washed the trees down, purified the atmosphere and so softened the soil as to make ploughing a very easy matter. Everywhere the ranchers were ploughing today and putting in barley. I do not think the rain did much damage to the growing beans. There is every likelihood that the crop of that vegetable will be unharmed as long as the dry weather that has followed the rain is not broken up by further showers."

Frank Marek, 250 S. Verdugo road, Glendale city's tree expert, who is also an expert rancher, is ploughing up some vacant lots which he has, for the purpose of sowing barley. Mr. Marek said: "It is very early undoubtedly to begin work of this kind; but the season is propitious. The rain has penetrated the soil to the depth of about a foot. The soil is easily turned over and the dry weather that has succeeded the rain is just the thing for favoring the growth of barley."

"I am sowing barley just now which I expect will be ripe about March. It is unusual to get such a chance and those who are in a position to take advantage of it are all at work as you can see. There will be sufficient moisture in the ground to keep everything fresh and healthy until the next rains set in."

"As city forester I am naturally interested in the effect the rain will have on trees. The trees in the city will naturally benefit greatly by being washed and cleaned of a certain proportion of scale. This will make it somewhat easier to handle that pest next summer. The rains too will benefit the water supply by filling the wells and reservoirs and by preventing forest fires which are destructive to the natural protection of the watersheds."

Mr. John Greve, who has a small ranch out on E. Fourth street, said: "I am taking advantage of the rain to plough up some of my ground and put it into barley. I should expect to find the barley ready to cut by the middle of March. In the course of my long residence here I do not recollect of having been able to sow barley at this time. The ground is in fine condition. I do not think there is much chance that mildew will attack the bean crop. The rain while heavy has not been prolonged and the dry weather that has succeeded it will make it practically certain that the bean crops will be threshed in good condition. This is gratifying as no rancher likes to profit at the expense of some other. I am going to take advantage of the fine condition of the soil to sow peas and I think that I may get a crop from them before frost can touch them."

SILVIUS KEEPS BUSY

The transfers of property for the month of September made by F. D. Silvius were as follows: House and four lots on E. First, owned by F. B. Marsh, to C. F. Delane. Lots 1 and 2, Tract No. 492, owned by W. M. Nichols, to Geo. Blinn. Lot No. 10, Pioneer Investment tract, owned by C. B. Guthrie, to Clarence Bull. House and lots No. 1637-1641-1645, owned by S. Beck, to Benj. Gray. House in Eagle Rock and acre of ground owned by C. B. Gray to S. Beck.

TO SPEAK ON IRELAND

Prof. Jerome Hall Raymond will give his famous lecture on Ireland on Friday, October 6. He will speak of the characteristics of the Irish race, landlords, the struggle for home rule, ancient traditions and the superstitions of the Irish race. Do not miss this lecture, at the High school auditorium.

GOOD-TEMPLARS MEET

FIFTY-SEVENTH SESSION OF GRAND LODGE OF CALIFORNIA LARGELY ATTENDED

Fifty delegates from various lodges of the International Order of Good Templars were in evidence yesterday in the city, and they were strengthened by the companionship of many members of the Order belonging to the Glendale lodge, who escorted them to the hall at the corner of Third and Isabel street, where the I. O. G. T. convention met at 10 a. m. This was the fifty-seventh session of the Grand Lodge of California International Order of Good Templars.

The morning session was occupied with the reading of letters and telegrams from several officers who were unavoidably absent and also from lodges that were unable to send any delegates to represent them. Other routine work was dispatched.

At the afternoon session further routine work was taken up. The officers of the Grand lodge read their reports and the standing committees also reported. Discussions of various points of interest connected with the work of the Grand lodge occupied some time. The meeting adjourned till 7 p. m.

At 7 p. m. a banquet was served to 150 members and delegates. This was followed by an entertainment. Mrs. Fuller gave a piano solo which was much appreciated and loudly applauded.

Mayor J. S. Thompson then gave an appropriate address of welcome to the delegates who had come from all parts of the State to take part in the convention. He reminded them of the long and honorable history of the Order, which, founded in New York in 1851, had become an international body and had spread to all countries. Standing for temperance and the highest moral ideals the Order had progressed and increased and was always in the front of great movements such as that now in progress for the extinction of the liquor traffic in the United States. He assured the delegates that they were welcome to the city which would endeavor to show them all the courtesies of a kindly host.

W. K. Jeffs, Grand Chief Templar, made a suitable reply. Brother Norton then addressed the convention. Afterward a quartet sang, "Randall Must Remain."

Congressman Randall then addressed the convention. He was accorded a hearty reception. He gave a graphic description of the difficulties surrounding the introduction of a bill in congress. The maneuvering and watchfulness required to get anything like favorable action on a new bill, when so many were seeking to engineer measures of their own were told in an interesting manner. Finally when the bill had been sent to a committee for consideration there was just as much trouble and labor and red tape to get it reported back to congress. Without constant vigilance a bill was likely to die in the committee. Speaking of the campaign for "California Dry" Mr. Randall said that he felt certain that measure would be carried at the November election. The majority of Congress, he said, favored nation-wide prohibition but the lobbying of the liquor interests was active and successful in throwing obstacles in the way.

This program was followed by a good social time which was enjoyed by all to a late hour.

The convention met Wednesday morning for its second day. The morning session was taken up with routine business. At 2 p. m. the delegates were guests of the Chamber of Commerce, who are taking them for an auto ride through the San Fernando valley. At the evening session the Grand Lodge degree will be conferred.

Thursday will be the last day of the convention which will proceed with the election of officers at the morning session and in the evening will confer the I. S. L. (International Supreme Lodge) degree on candidates.

W. C. T. U. TO MEET

The Woman's Christian Temperance Union will meet at the Christian church, corner of Louise and Colorado boulevard, Friday, Oct. 6, at 2:15 p. m. There will be a special prayer service for the success of the present dry campaign throughout the state. This service will begin at 3:15 p. m. Every woman present is expected to give a two-minute speech on "Why California Should Go Dry." A 10-minute parliamentary drill will follow. Women of all churches and societies are earnestly invited to join in the meeting, which is open to all.

TERAUCHI IS JAPAN'S NEW PREMIER

FIELDMARSHAL AND HERO OF WAR WITH RUSSIA IS SELECTED BY MIKADO AS HEAD OF NEW CABINET

(Special Service to Glendale Evening News)

TOKYO, Oct. 4.—Fieldmarshal Terauchi has been selected by the Mikado as the successor of Count Okuma. The new premier will form a cabinet, the composition of which will be announced shortly. Count Okuma stated as his reason for resigning that his advanced age operated against his giving the best service to the country. It is believed, however, that the young emperor, who is a man of military ambition, was desirous of having as premier a man of bolder national policy.

BRITISH TAKE EAUCOURT ON SOMME FRONT

STOUTLY DEFENDED POSITION IS CARRIED BY GEN. HAIG'S TROOPS AFTER A SERIES OF ATTACKS

(Special Service to Glendale Evening News)

LONDON, Oct. 4.—The British this morning wrested Eaucourt from the Germans or rather that part of the ruins of the village which the Teutons succeeded in entering yesterday. The Germans evidently attached great importance to Eaucourt, as while other portions of their line were but weakly held they had vast forces at Eaucourt point and attacked again and again in the most determined manner. In the furious encounters that occurred in this quarter the British advanced closer to Bapaume.

ALLIES HAVE MADE NOTABLE ADVANCE

TERRITORY GAINED ON THE SOMME IS EIGHT AND A HALF MILES ON TWENTY-FIVE MILE FRONT

(Special Service to Glendale Evening News)

PARIS, Oct. 4.—The French registered a considerable gain yesterday on the Somme front when they carried a German trench north of Rancourt. The trench there had been defended by the Germans with characteristic vigor but they were driven out and 120 made prisoners. The advance made by the Allies since the beginning of the offensive is now eight and a half miles on a twenty-five mile front. The artillery bombardment was necessarily lessened owing to the difficulty of taking observations in the heavy fog.

VILLISTAS AND CARRANZISTAS CLASH

FIERCE FIGHT BETWEEN DE FACTO'S AND REBELS CLOSE TO AMERICAN LINES

(Special Service to Glendale Evening News)

EL PASO, Oct. 4.—While a strong body of Gen. Trevino's forces was marching toward Casas Grandes this morning, it was encountered by a band of Villistas. The two forces immediately opened fire. The fight took place near Casas Grandes and was close to Gen. Pershing's lines. The American troops were able to see a good part of the encounter, which was spread over a wide area, the Villistas getting the best of it.

BULGARIANS DRIVEN OUT OF POSITIONS

ALLIES TAKE SEVERAL STRONG POSTS IN THE BROD RIVER REGION IN MACEDONIA

(Special Service to Glendale Evening News)

SALONICA, Oct. 4.—Advancing from Karavabakoi, the Allies stormed and took several villages in Macedonia. The British took the village of Jenikoi. The Bulgarians immediately abandoned several other positions and retreated. Severe fighting is still going on for the possession of the Kaimacalan ridge which the Servians wrested from the Bulgarians. Kaimacalan dominates Monastir, which is at present a Bulgarian base of much importance. The Bulgarians are still fighting hard to regain the plateau, but without success.

NEW YORK MAYOR ENTERS MILK DISPUTE

MITCHELL TRIES TO INDUCE DAIRYMEN AND DISTRIBUTORS TO AGREE

(Special Service to Glendale Evening News)

NEW YORK, Oct. 4.—Mayor Mitchell entered the controversy between the milk producers and the distributors this morning. He is endeavoring to get a conference between the up-state dairymen and the city distributors in order to find some ground on which they can meet with regard to price. There is evidence that a ground of settlement can be discovered as both sides are tired of the fight.

GERMANS PROSECUTE FIERCE U-BOAT WAR

BERLIN, Oct. 4.—During the period that has elapsed between Sept. 21 and Sept. 29 the German submarines in the North Sea and other waters adjacent to Britain have sunk 14,600 tons of allied merchant shipping. The German leaders are urging the prosecution of the submarine campaign to its utmost limit and demand that British vessels be sunk without regard to passengers or the nationality of passengers on board.

FOR CALIFORNIA DRY

FEDERATED BROTHERHOOD OF SAN FERNANDO VALLEY CHURCHES BANQUET

Those responsible for the engineering of the banquet of the Federated Brotherhood of the churches of San Fernando valley have every reason to congratulate themselves on the splendid success of the affair. The banquet was held in the Masonic Temple and the three long tables that occupied the hall were filled with guests. A large contingent of ladies of the First Methodist church had provided the supper and gave excellent attendance. The tables were tastefully decorated.

Dr. I. H. Durfee, president of the Brotherhood, presided. He said that the Brotherhood looked for having a clean state by the action of the voters in November. He called attention to a change in the policy of the Brotherhood, which, for the first time, had invited the ladies to take part in their deliberations. He then introduced Miss Brehm of Chicago, one of the best known temperance workers in the country.

Miss Brehm said that at present all energies must be directed to making California dry. Afterward they would make of the United States a dry nation, a clean nation. In time they would clean up this old world and make it dry. All nations and governments now recognize that the liquor traffic is an evil. The liquor people themselves never come out in open defense of their business. They shelter themselves behind something else. In Oregon they hid behind the hop industry, in West Virginia they were deeply concerned over the harm that would result to the glass blowing industry; in California it is the grape vine industry.

The speaker told of her travels in various parts of the world; particularly in the Island of Madeira, where she said the direst poverty was associated with the people who worked in the vineyards. It was the same everywhere. The men's wages were paid in part in wine.

The scientists of the world were agreed that alcohol is a poison. It attacks the brain. Brain is man's capital. From alcohol come poverty, insanity and immorality.

Miss Brehm then showed that the argument for personal liberty was a fallacy in this respect, that the state did now interfere with personal liberty by its laws dealing with preventive measures against yellow fever, which had been stamped out by vigorous measures; its prohibitory action against bubonic plague, in the destruction of rats and squirrels. New York had shown what can be done by the quarantining of victims and households where infantile paralysis was found. The banishment of cows from communities, the public drinking cup—all were examples of prohibition; now the time of alcohol had come. It must go. As a matter of health protection the liquor traffic must be suppressed. It was the greatest enemy of the human race. She closed with an appeal to the voters to register before election.

In the absence of Dr. Gandier, Dr. Montgomery, Legislative Superintendent of the Anti-Saloon league, gave an interesting and stirring address. He said that they were having a hard fight in Los Angeles. They found that Los Angeles was a much more difficult city to convince than San Francisco. It was harder to get temperance people into the harness. San Francisco he said would give a prohibition vote 100 per cent greater than in 1914. The people are waking up. The temperance forces have now a tremendous organization and that organization is beginning to tell. A mighty army of godly men and women is working.

California, he said, had the biggest job of any state that had as yet fought this fight. There was the hop industry to combat; there was the wine industry. However, they were confident of victory. At the beginning of the campaign they calculated that if they could organize 60 per cent of the precincts north of the Tahachapi they would win. Now they had organized 95 per cent of those precincts. It was not possible to lose on November 7. They had an army of nearly 80,000 volunteers working. This was a mighty army, mightier than any force the liquor interests could put in the field.

Dr. Montgomery then talked of the grape industry and showed that the Cucamonga winery had already planted 4000 walnut trees and sowed seeds for the production of 100,000 more trees of the same kind, in anticipation of the extinction of the wine industry. Stanford university had rooted up its vineyards and planted alfalfa, beans and potatoes. That process would go on all over the state and prosperity would fol-

CHARTER COMMITTEE

FIFTEEN APPOINTED TO STUDY FREEHOLDERS' CHARTER HOLD MEETING

The committee of fifteen appointed eight months ago by the Chamber of Commerce to inquire into the advisability of having the city of Glendale governed by a Freeholders' charter instead of by the Sixth class city government charter met in the city hall Tuesday evening to discuss the question with members of the Chamber of Commerce and other citizens of Glendale. No definite action was taken asking the city trustees to take steps for the appointing of an official Freeholders' charter committee as it was thought best by a majority of those present that it is well to have the general public become interested in the merits of a Freeholders' charter because what may be considered a suitable charter by those who have made a study of the various sections of the charter may be opposed by those who have not given the points in the proposed charter any consideration.

J. W. Usilton, president of the Chamber of Commerce, who called this special meeting, announced that it is not his intention to serve longer in the capacity of chairman of the Chamber and stated that he would not be present to preside at the next meeting and therefore it would be in place for the members to arrange to have some one serve in his stead. Mr. Usilton stated that it is his opinion that there are those who think he stands in the way of the further success of the Chamber and as he has at heart the best interests of the Chamber of Commerce and the City of Glendale he feels it his duty to give up the leadership of this organization. He however assured those present that he will remain a member of the Chamber of Commerce and do all within his power to aid the officers.

As next Monday evening is the regular meeting night of the chamber all action concerning Mr. Usilton's statement was postponed until that time.

P. T. A. PRESIDENTS MEET

The presidents of the various Parent-Teacher associations met Tuesday, Oct. 3, at the home of Mrs. C. E. Hutchinson, Orange street, for the purpose of making arrangements for the entertainment of the teachers of the city schools. The teachers of all the grammar schools, the Intermediate and the High school will be guests of the combined associations. Mrs. Hutchinson, president of the Parent-Teacher Federation of Glendale, presided. Those present were Mrs. Ella W. Richardson, president of Pacific Avenue P. T. A.; Mrs. John R. White of Columbus avenue, Mrs. Meeker of the Intermediate, Mrs. Beamon of Colorado boulevard, Mrs. Anderson of Broadway and Mrs. Plasterer of Doran street. The entertainment will be given in the High School, October 17.

D. A. R. CHAPTER TO MEET

General Richard Gridley Chapter of the Daughters of American Revolution will meet at the home of Mrs. J. H. Braly, 205 N. Brand boulevard, Thursday, Oct. 12. Anyone desiring to become a member of this organization and eligible to membership will be cordially welcomed. The qualification for membership is that one must have an ancestor who took part in the Revolution of 1776, either in a military or official capacity.

WEATHER FORECAST—Fair tonight and Thursday; warmer; westerly winds.

low. He ended with a powerful appeal to all to work for a clean, dry state.

Those who assisted in the management of the affair were Prof. Howe, Ed. M. Lee, A. W. Tower and T. D. Ogg. The ladies who attended to the details of cooking and serving the supper were the members of the Ladies' Aid of the First M. E. church, Mrs. R. Lacey, president. Mrs. Ellis and Mrs. Shattuck superintended the dining room service. Those who served were Mrs. Ed. Lee, Mrs. C. Phillips, Mrs. Noyes, Mrs. Russell, Mrs. Raymond Lusby, Mrs. W. Knox, Mrs. Earl Sharkey, Mrs. Jack Wagon, Mrs. Claude Case, Miss Nell Case, Miss Dana Goss, Miss Cora Braecwell, Miss Helena Swartz, Mrs. Arrington, Miss Lois Spickerman, Miss Leone Shattuck, Mrs. Morten, Mrs. Kille, Miss Doris Ingledue, Miss Melba Weiler, Miss Emma Lee Weiler, Miss Marian Addison, Miss Eva Beckman, Miss Hattie Beckman. The Kitchen committee was as follows: Mrs. C. W. Ingledue, Mrs. Spickerman, Mrs. Case, Mrs. Winter, Miss Nolan. Mr. C. W. Ingledue and Mr. Roberts acted as carvers.

GLENDALE, CALIFORNIA, WEDNESDAY, OCTOBER 4, 1916

HINDOO CONCEPTION OF JAPAN'S MISSION

Amid the stir of awakened thought that the international struggle in Europe has created in the Far East nothing is more significant than the restlessness of Japan. This restlessness has spread all over China. It has penetrated Siam, India and the Orient generally. Its fruits will be found many a year hence in the development of nations.

Among those who have taken note of the change in conditions in the Far East is Sir Rabindranath Tagore, the Hindoo poet and savant. Tagore, while appreciating the work done by Britain in India and acknowledging the debt India owes to the British empire, has a vision of a time when the various nations of the East shall no longer need the guidance of the west.

Tagore is coming to the Pacific coast to lecture on his favorite topics and he will doubtless have much to say along the lines he has already traversed. He thinks that Japan has a mission to perform in the Far East. While Japan has adopted and adapted to her own use, he says, the habits and knowledge of the western nations, in a most marvelous manner, it is to be hoped that she will stop imitating other civilizations before the whole of the distinctive features of the Japanese nation are lost. It would be a grave misfortune if Japan should cut loose from her own ideals or from her own past.

Tagore says that India went through a similar experience. When western civilization came into India the novelty of its customs took a very strong hold on the imagination of the races in the country, especially the younger men. They began to imitate what they saw. They conceived a distaste and a dislike to the ways of their fathers and thought that it was the height of wisdom to wear the garments and assume the manners and speech of the British. Like all imitations this was distasteful to the more farseeing Hindoos and they foresaw the debilitating effect it would have on the nation.

At the same time Tagore realizes that this was a phase through which the Hindoos passed and that it would not be long before the reaction would come. Between these two extremes the nation is adjusting itself. By and by it will find itself. He says that Japan has also passed through a period of imitation of western ideals; but that the nation has borrowed them as one would borrow a garment and that they are not a part of the nation. The apparatus of the West can never satisfy the soul of the East. Thoughtful men in Japan say that they feel this and that they realize the need of harmonizing Japan's present with her past. In Japan the great Hindoo poet was received with enthusiasm and cordiality. The Japanese made every effort to make the poet feel that there was a spiritual unity between himself and them.

The East, according to Tagore, must reconcile its thought with the mechanism of the West. The East must learn no longer to ignore matter but to subdue matter to achieve freedom for the soul. Science and mechanical arts will become the common possession of the whole world. There is no fear that the mind and soul of the world will become uniform. The material things are external and do not touch the soul of the people. In the long run the world will achieve a kind of federation of nations in which each will contribute its characteristic philosophy.

In taking part in this work, says Tagore, Japan cannot stand alone. She should seek to weld together in a kind of union herself, China, Siam, and India—a free India. That would be a United East that would have a remarkable effect on the future history of the world.

In the modern world as in the ancient world the poet is often a prophet. In fact these two terms are exchangeable. Tennyson, who foresaw the "parliament of man" and the "federation of the world," was a true prophet.

It may not look very much at present as if the time were near when the "war drum throbs no longer and the battle flags are furled" but out of all the chaos and confusion of the great war a voice like that of Tagore can point prophetically to the advance of the world toward the vision of the English poet.

NATURE STILL AT WORK

Throughout the natural world there is a constant process of building up and breaking down. While Nature destroys something she is always reconstructing and making over her material. There is not a great deal of difference chemically between water and peroxide of hydrogen—just one atom of hydrogen—but the two substances while very like in appearance are very unlike in properties and action. That is an example that the majority of people can appreciate for peroxide of hydrogen is known to almost everyone nowadays and water is known to everyone.

Just as peroxide of hydrogen was evolved chemically so Nature is carrying on vast chemical combinations in the world and the results of some of those combinations are new products from Nature's laboratory. This process is going on before our eyes. All the products of Nature are not of some far distant geological age; some are of recent formation. Products of nature's laboratory may have either been recently formed or may only have been recently discovered.

The geologists of the United States Geological Survey, Department of the Interior, are constantly discovering new minerals. The same physical and chemical laws that were in operation when the products of some remote period were formed are at work now. It is a common saying among miners that "gold grows." The old miner or prospector was thoroughly convinced that the process by which gold was formed in early ages is still going on and now as a general proposition the scientists support what used to be ridiculed as a sample of profound ignorance. Geologists are familiar with products that have been recently formed.

Among the new minerals sent in by the scientists of the Geological Survey or forwarded by an outsider for inspection some specimens turn out to be new minerals. A mineral may be regarded as

EAGLEDALE NOTES

Much interest is being taken by this community in the little school of the district. The district is growing so fast that the school is now crowded. It is even now essential that a new building should be erected. The people of this community are not anxious to send their children all the way to the Eagle Rock school and they think they should have a school of ample dimensions and with modern equipment in their own district. The feeling on this subject is strong and may yet result in a movement for annexation to Glendale.

Mrs. Lerchen of Ellis avenue entertained a large party, Saturday night, at her spacious residence. About fifty guests were present. The affair was a dancing party and the guests had a most enjoyable time.

SPIRITUAL CHURCH

The Harmonial Spiritual church of Glendale meets at the home of Mrs. E. Z. Barnett, 502 W. Ninth street, every Thursday evening at 8 o'clock. Everybody welcome. tf-Wed

new when it only differs from another in crystal form. Variations in composition may or may not justify a new name.

Minerals that differ from varieties already known merely by the displacement of one atom and the substitution of another are not deserving of new names. However, a mineral which consists of a compound never before noted in nature such as the compound of bismuth and molybdenum to which the name "koechlinite" has been given, is really a new mineral.

Modern scientists prefer now to give names to new minerals from the place where they were discovered, because the new minerals are daily increasing. Names thus given are easy to remember by association. Other names are given by reason of chemical composition or crystallographic form. Occasionally some striking character in a mineral is apparent even to the most unskilled observer. If the crystals are large enough to be measured by a rule almost anyone can see the significance of the various angles and forms.

Crystals of spodumene more than forty feet long have been observed in the famous Etta mine, in the Black hills, South Dakota. It would not be difficult for the most unscientific to realize and to describe the appearance of such a mineral but often the minute points of difference between minerals are not noticeable except to an expert. Hence many interesting new minerals are never classified.

INFORMATION

He was a young college professor and he had been on a hunting expedition for several days in the backwoods, roughing it rather severely, and on taking a seat in a suburban trolley car returning homeward he looked as begrimed and weatherbeaten as a trapper as ever brought his skins into a settlement. He happened to find a seat next to a sedate young lady—evidently just graduated—who, after taking stock of him for a few minutes, remarked, "Don't you feel an utterly passionate sympathy with nature's most incarnate aspirations among the sky-topping mountains and the dim aisles of the horizon-touching forests, my good man?" "Oh, yes," replied the apparent backwoodsman, "and I am also frequently drawn into an exaltation of rapt soulfulness and beatific incandescence of infinity of abstract continuity when my horse stumbles." "Indeed!" said the young lady, much surprised. "I had no idea that the lower classes feel like that."

Opportunity is knocking on all sides at all times. And the knocking is not faint, but you will not hear it if you continue to cry over disappointments.

Some of the finest opportunities of life have been missed because we looked too intently at the time on the broken pitcher and the spilled milk.

REGISTER BEFORE CLOSE OF OCTOBER 7

Saturday, October 7, 12 o'clock at midnight, closes the registration of voters for the November 7 election. Those who have not registered will do well not to wait until Saturday but register at once. A convenient place to register is with Miss Sarah Pollard, 413 Brand Boulevard at the Glendale Book Store. 31t5

Lanterns at Glendale Implement Co., Third and Howard.

Personals

Friends of Dr. F. N. Arnold should remember that his dental rooms are now located above the Glendale Savings Bank in the Flower block.

Clem Moore, who for several years has had his office on West Broadway, has changed the same to his residence at 1468 West Second St.

Mr. Raymond Hayden of Point Fir-men was the guest, Saturday and Sunday, of Dr. and Mrs. H. V. Everly of 1640 Oak street.

Mrs. Mabel Ocker, 1498 W. Third street, who has been visiting friends at Long Beach, returned Tuesday, after a ten days' stay at the ocean side.

Miss Marie C. Brehm, who has a national reputation as a lecturer and W. C. T. U. worker, is a guest at the home of Prof. and Mrs. W. J. Root on Verdugo Road.

Hubert Everly, the little son of Dr. and Mrs. Everly, 1640 Oak street, who has been suffering severely from the effects of ptomaine poisoning, is rapidly recovering.

Mrs. Andrew McIntyre is very busy knitting socks for Tommy Atkins. Come to the Guild Hall next Monday afternoon to Tommy Atkins' Christmas party and you will learn who he is if you do not already know.

Mrs. C. R. Norton, 373 W. Third street, wife of the Rev. C. R. Norton, has been very seriously ill, at her home, during the past week. Her many friends will be glad to hear that she is now getting better.

The Rev. Dr. Henry of 916 S. Central avenue sang, by special request, at the meeting of the Veteran Ministers' Association, which met in Los Angeles Tuesday. The Rev. C. R. Norton, of 373 W. Third street, made a striking address on the past work of the association.

Dr. W. A. McPherson, who for three years has resided at 426 So. Jackson St., Glendale, left Wednesday of this week accompanied by his son and daughter for Le Roy, New York, where they go to join Mrs. McPherson, who has been at that place since last April, caring for her invalid father.

Mrs. W. G. Shaw of Colorado Springs, Col., arrived in Glendale Tuesday, to visit her brother, J. M. Banker, city building inspector. Mrs. Shaw will remain in Glendale thirty days, during which time she will be a guest at the Banker residence, 231 Cedar street. Mr. and Mrs. Shaw were pioneers in Glendale and resided here for sixteen years. Afterward they moved to Los Angeles and then to Colorado Springs, where Mr. Shaw is employed in a publishing house.

MOVES IN REAL ESTATE

T. J. Morgan says that the building and real estate business in Glendale, as far as he is concerned, is quite active recently. He is building at present a 7-room Swiss chalet, at 1515 W. Broadway, and is about to start building an 8-room chalet at 1311 Campbell street. The 7-room Swiss chalet which he has just finished building at 1315 Campbell St., has been sold to A. Jenkins of Milford street.

Mr. Morgan has also sold a 7-room bungalow, at 401 North Louise St., to Mrs. Cushing of Los Angeles. His 7-room bungalow, at 403 North Louise street, he has sold to David Gentry of Los Angeles, who will move in with his family within a few days.

"MYSTERY" IS SOLVED

That "mysterious" individual, who has been quietly investigating premises of about every householder in town during the past two weeks, is William Johns, a horticultural inspector for the county. He has been accompanied at times by A. C. Fleury, county horticultural commissioner.

Johns carries with him a large entry book in which he keeps track of all lots having trees. He keeps tab of all trees, noting whether they are affected by scale or other disease. During the time spent in Glendale and Tropico, he has found black scale affecting pepper trees to considerable extent, especially in Tropico where there is no city forester.

Housewives who have been alarmed at Johns' peculiar activities may rest assured that the investigator has been strictly attending to business. Johns has a dark complexion, wears a black mustache and is of medium build. He dresses in good clothes. Fleury has a light complexion and is usually dressed in brown clothes and leggings. Both men carry proper identification and will willingly explain their mission on your property.

THIRD STREET P. T. A.

The mothers of the Parent-Teacher association of the Third Street school have planned a pleasant, informal, social evening, in honor of the teachers, Thursday, October 5, at 8 o'clock, at the schoolhouse. It is earnestly desired that all fathers and mothers who have children in the school be present. An exceptionally fine program has been planned.

Mrs. Webster, the dressmaker at 210 E. Broadway, is pleased to announce to the public that after her long illness she is again able to attend to business and will be pleased to see her old customers, also new ones. Phone 99-W. 3212*

GLENDAL E H I G H

Winter is coming again, close up on the heels of the opening of school. Again the big umbrella rack in the main hall is doing duty, for the curtain is going up for the rainy season, and a good performance it promises to be. Already the actors have proved themselves a lively bunch,—indeed, Glendale High never housed a more active lot—and with the spice of winter in the air, many eventful days will come.

The T. O. C. is not asleep. Next Friday evening it will give its first dance at the home of Carleton West, one of its leading members. The bashful bachelors of the club—O, yes, there are some—are already wondering just which young lady they are going to ask and Carleton gives one long sigh of relief when he remembers that the affair is to be held at his own place.

Stanley Creswell gained a name for himself Tuesday when he downed the prominent Sophomore leader, Chauncy Kolts, in a catch-as-catch-can wrestling match before the T. O. C. on the front lawn. The new mat champion took the crown very modestly.

"Please Do Not Whistle in the Halls." This is the text of the warnings tacked up in various conspicuous places yesterday. Mr. Howe has a very forceful way of pointing them out to near-sighted students.

Glories for the first day of inter-class tennis went to the Seniors. McGillis and Fischel beat Brown and Long 9-7, 6-0; McGillis beat Long 6-2, 6-1; Westwood beat Powers 6-3, 6-2. Wilson lost his match to Greenwald 6-2, 6-4. After the Seniors and Juniors have settled their differences the Sophomores and Freshmen will play. Many interesting matches are promised.

Two of Glendale High school's crack tennis players, William "Pygmy" Bathis, and Lehman Crandall, played for the honor of representing their alma mater at Ojai this year. Bathis won. In discussing Glendale's tennis prospects this year Captain Crandall yesterday forecasted a brilliant and successful season. Manager Bathis added that that expressed his opinion, too.

BELL MAKES STATEMENT

Appearing in this issue is the announcement of Hon. Charles W. Bell, Independent Republican candidate for Congress in the Ninth District. As a former member of Congress from this district, Mr. Bell's work for National Prohibition and his firm stand for protection, together with his able service in looking after district matters, gave him a wide and favorable acquaintance with the voters.

In a statement accompanying his announcement, Mr. Bell says:

"I was not a candidate at the recent Primary, but thereafter a district conference of Republicans and Progressives, representing all sections of the district was held, and I finally consented, at the request of that conference, as well as scores of leading citizens, to enter the campaign. So generous has been the response of voters that I now feel confident of being sent to represent the district in Congress again. My name will be printed on the official ballot with the designation, 'Independent.'"

"My work in Congress, where I voted and spoke for National Prohibition, makes my stand on that issue clear to all. I am for a Dry California and a Dry Nation."

"This district needs a Republican congressman, who will fight for the Republican policy of protection and the restoration of an adequate tariff on citrus fruits and other products of this district. I am such a Republican."

"My opponent is bound by the Democratic caucus and votes with the Democrats, and in the matter of tariff cannot serve the best interests of the district."

"I am for adequate preparedness for national defense, and will so vote. I am not for militarism. I believe in economic as well as defense preparedness."

"The citrus growers and voters of the district generally are giving me assurances of their united and enthusiastic support. They know well where I stand. During the campaign I shall discuss all the issues involved. I have every hope of success."

DR. RUSSELL IN NEW MEXICO

Communications received by friends from Dr. Jessie A. Russell, who is in New Mexico organizing for the Republican party, state that she is enjoying a very delightful trip. She was the guest of honor and a speaker at the Santa Fe Women's club last week; has been invited to be the speaker on Women's Day at the Albuquerque State Fair, where she will give an address on "Women in Public Life." She will also appear on the program at the state convention of the New Mexico Federation of Women's Clubs, to be held at Las Vegas October 3-6. Following the convention Dr. Russell has planned a state-wide tour of speaking and organization. Her address is the Hotel De Vargas, Santa Fe, New Mexico.

DR. HALL of Los Angeles will give a health lecture to ladies at I. O. O. F. hall, Glendale, Friday, Oct 6, at 2 p. m., free. 3312

TROPICO TRUSTEE

MONTHLY REPORTS OF CITY OFFICERS FILED—WATER RATES DISCUSSED

Reports of the city officials were read and filed at Tuesday night's meeting of the Tropico board of trustees. President Peters and Trustees Seal, Alspaugh and Henry were present, besides several other city officials.

The report of the city clerk for the month of September showed a balance in the general fund of \$2,621.45 on the first of the month with disbursements amounting to \$1,100.03, which left a balance on hand of \$1,521.42.

A communication from the Keystone Iron Works of Los Angeles stated that it had charged \$52.00 to install a single electrolier on Brand boulevard to replace one smashed by a Los Angeles moving picture actress who was learning to drive an auto.

The trustees are now taking steps to obtain the cost of the light from the person responsible for the accident. The Keystone Iron Works assured the board that their charge was much under regular for that type of electrolier.

That the Tropico trustees should take some action on the matter of trimming the pepper trees in the city's parkways, was the request of the Los Angeles County Horticultural commission. A. C. Fleury, commissioner, was present and spoke on the advisability of the city hiring a man to tend to trimming of the trees. He stated that both Pasadena and Glendale had found it a satisfactory way of handling the scale question, the latter place having a city forester.

Permission to erect a sign in a parkway for a period of 30 days was granted the Methodist church on the request of its pastor. The sign-board will be used to advertise certain amendments which will be on the November 4 ballot.

The city clerk was instructed to write to the Southern California Gas company asking that concern to lay a gas main on Hill street between Moore avenue and Green street immediately after the Hill street grading is completed and before the new surfacing is done. G. A. Mudgett appeared before the board representing the Hill street property owners in the matter.

A similar request will be made on the gas company by the city for the laying of mains on Acacia street within 150 feet of Central avenue.

It was suggested by the city engineer that public utilities companies be requested to deposit a certified check with the city clerk for the proper repair of streets in which excavations are necessitated.

The engineer also stated that he would be able to secure the deed for a 14-foot strip of roadway to Glendale avenue near San Fernando boulevard from Mr. Wells, the owner. No consideration would be asked.

The matter of opening Columbus street was referred to the city attorney for legal inquiry. The matter of settling with Mrs. Larsen for property deeded the city for street purposes some time ago was deferred another week.

A. H. Hamilton of Glendale was granted a city auto bus license.

Trustee Seal presented a resolution asking for a depot to be erected by the Pacific Electric at Tropico. After much humorous discussion, the resolution was withdrawn. The chief argument for the resolution was that a depot would rid the city of the unsightly waiting shack at Tropico and Brand. Trustee Henry replied to Trustee Seal's argument by saying the shack would make a good fire for a practice run for the fire department, which is located but 50 feet away, or that Seal might take it upon himself to tie the rickety wooden structure to a car and let the car crew haul it down to the Los Angeles river.

The city clerk was instructed in a motion made by Trustee Henry and seconded by Alspaugh to draw up several petitions requesting the railroad commission to establish former rates for the water company serving Tropico. The new rates make fire protection cost exorbitant. It is understood the former rates are satisfactory to the water company.

The following demands were allowed:

Keystone Iron Works.....	\$52.00
W. Edwards.....	41.00
E. C. Fairfield.....	40.00
J. S. Ripley.....	5.00
Tropico Feed & Fuel Co.....	3.40

PRESBYTERIAN FOOTBALL TEAM

The Glendale Presbyterian Baraca football team will play Lincoln High school of Los Angeles, Saturday afternoon, Oct. 7, on the Third street school grounds, at 2:30. Lincoln is said to have a very excellent team, but the local boys hope for a victory. Saturday, Sept. 30, the Baracas won from San Fernando by the score of 24-6. The San Fernando boys were outclassed altogether. Practice will be held Thursday night at 7:30 at the usual place. The following men are asked to report: Sharpe, Smith, Wilson, Wieman, Barager, Pomeroy, Williams, Norton, Mciver, Eckles, Shea, Jackson, Power, McGillis and Glazier. Don't fail. This is highly important.

Leather straps made at Glendale Implement Co., Third and Howard.

—for Exchange:

HERE'S a splendid opportunity to exchange Glendale property for an unusually attractive site at Huntington Beach. Property embraces 2½ acres. Will cut into ten 50-ft. lots—worth \$400 per lot at lowest estimate. There are 18 fruit trees as well as a number of berry patches. Splendidly constructed nine room house—two-story, shingle roof. This is supplemented by a barn with ample space for garage. There are also two chicken corrals, one cow corral, one horse corral. House is newly painted and occupies a ground site of 24x42 ft. Ample water facilities. The soil is black sandy loam mixed with some clay. Has been well fertilized and now is in splendid condition. Property is just inside city limits and one block from car line. Distance from Los Angeles, 35 miles.

You can't pass up a proposition like this—they come too few and far between. Suppose you call Dr. Royce at Glendale 20-J and arrange for a personal inspection of the place. Now is the time to do it, too!

GARDEN SOCIETY MEETINGS

Thursday, Oct. 5, 8 o'clock sharp, High School auditorium—"Birds of My Garden." Stereopticon lecture by Mrs. Harriet William Myers, Sec. California Audubon Society. Distribution of prizes to Bird and Flower club.

Thursday, Oct. 19, 8 o'clock sharp, Library Third Street school—Social meeting. Informal discussion, Spring Gardens and Floral Contests. Vocalist, Mrs. Emma Schmidt in a group of Flower Songs.

Thursday, Nov. 2, 8 o'clock sharp, High School auditorium—"Public Parks and Playgrounds." Stereopticon lecture by Prof. J. W. Gregg, University of California.

Thursday, Nov. 16, 8 o'clock sharp, Library Third Street school—Plant party. Everybody bring a plant; everybody take away a plant. Music.

Thursday, December 7, 8 o'clock sharp, Auditorium Third Street school—Public awarding of prizes in monster Birdhouse Competition.

Benefit, January, 1917—Mr. Jensen of the Palace Grand has kindly consented to give the Garden Society a Benefit Night in January.

A silver cup, presented by the Garden Society, for the best Daffodils; also a silver cup for the best Iris, and a silver cup presented by Mrs. Walter Ross for the most artistic arrangement of any flowers in a vase, will be awarded at a Floral Contest to be held in March. Competitors must be members of the Glendale Garden Society. Any person may become a member by paying the annual dues, 25 cents. (Daffodil bulbs should be planted in October and are remarkably easy to cultivate; Glendale soil is excellent for all bulbs.)

Two silver cups, presented by Messrs. Howard & Smith for the best Roses, and a silver cup, presented by Mrs. Charles H. Toll for the most artistic arrangement of any flowers in a vase, will be awarded at a Floral Contest to be held in April. For these and succeeding contests see details to be issued later.

The Bird and Flower Club invites all members and friends of the Glendale Garden society to join its nature trips, assembling at Headquarters, 1111 Broadway, 11:45 a. m. every Saturday (except last Saturday of each month). Bring lunch and carfare.

Annual dues for the financial year October 1916 to October 1917 are now due.

MRS. NANNI WOODS, Pres.
MORRIS E. CARUTHERS, Sec.

FARMERS' VACATIONS

In times past it was quite exceptional, if not an unheard of thing, for a farmer to take a vacation. Summer, the usual vacation time, was the busiest season on the farm, with little time for pleasure of any kind. In fact, it was one task or chore after another from one end of the year to the other, and a vacation seemed a frivolous and wasteful thing.

All this has been more or less changed of late, and many farmers take vacations much as other human things do. It is the automobile that has had a great part to play in this change.

When once an automobile comes into possession of a farmer's family, the custom of planning a vacation tour in the car develops rapidly, to the extent that there would be much disappointment and grumbling if the outing were made a secondary place in the summer program.

Many farmers are willing to acknowledge that more and better work is done on the farm by reason of a few weeks or days of recreation thrown in here and there.

ARTIFICIAL GEMS

Artificial gems are being made in Paris which so closely resemble the genuine that it is difficult for any but experts to detect the difference.

Henri Moissan, one of the greatest French chemists, has manufactured imitation diamonds by dissolving sugar in boiling iron. M. Varneull has made commercially successful the manufacture of artificial rubies, while the "Oriental emerald" which comes from his factories has been pronounced by many to be superior in hardness and color to nature's own product, and higher prices have been paid for the imitation gems than for many that are genuine.

The amethyst, sapphire and topaz have all been artificially reproduced, and so closely do they simulate the real thing that even experts are frequently puzzled.

SHADOWLESS LIGHT

One of the latest improvements in hospital equipment is the invention of a shadowless light for the operating table. This has been secured by a fixture, containing eight electric lights, placed so that the rays meet at an angle of forty-five degrees.

This makes better vision possibilities in examination of wounds, and also eliminates the possibility of a delicate operation being hindered by the shadows cast by the surgeon's hands, as is frequently the case with lights ordinarily placed.

It is said that the shadowless light will lessen the number of accidents in many industrial establishments, where much depends on the clearness of the vision of workmen.

RULES FOR AIR TRAVEL

At the Pan-American Aeronautic Conference, held in Santiago, Chili, definite steps were taken to call a congress to formulate a universal code to govern aerial locomotion. An international agreement for free transit of all kinds of aerial craft was suggested.

It was decided that all space higher than the height which may be utilized by the proprietor of the ground beneath which shall be declared public property, for public use. It was also decided that private aeroplanes belonging to the citizens of a country should have the right of passage through the space over other countries; that every aeroplane should have a nationality and have a distinct emblem of nationality after having been registered.

The conference favored the employment of aeroplanes in the service of the Red Cross, and suggested that the various nations come to an international agreement for the broadcast facilities for the free transit of all kinds of air craft over each country.

STAGE SCENE 6000 FEET BELOW GROUND

A company of motion picture players headed by Vivian Martin, the popular screen star, has just arrived at the famous Empire mine in Grass Valley, California, and is busily engaged in the filming of several underground scenes. Some of these scenes are being photographed 6000 feet below the ground under extreme difficulties. This is the first time in the history of motion pictures that scenes were ever filmed at this depth and some wonderful effects are expected for Miss Martin's new photoplay "The Right Direction."

HOLLYWOOD'S PREDICAMENT

Since Hollywood was annexed to the city of Los Angeles her home protection spirited citizens have been subscribing large sums of money to fight unreasonable special assessment schemes forced upon them by the city administration of Los Angeles. When you read the writings of a paid annexation booster from Hollywood just bear in mind that he is working for wages and it is his duty to be loyal to his master and not to the people of the territory Los Angeles seeks to annex.

Whips, all kinds. Glendale Implement Co., Third and Howard.

HERE'S A SURE ROAD TO WEALTH

In the September "American Magazine" a writer in the "Family Money Department" says:

"There is one sure road to wealth. It is not a get-rich-quick scheme, no wildcat mining venture, no 'war baby' speculation; it is simply a common sense way of attaining a small fortune in a strictly legitimate way. 'One dollar deposited in a savings bank each week for twenty years would amount to \$1612.

"Five dollars deposited each week for the same length of time would become \$8000. The interest on this \$800 would be six dollars a week. Anyone following out this plan of weekly deposits of five dollars for twenty years could at the end of that period draw out of the bank six dollars each week as long as he lived and still leave to his wife and family at his death not only all he deposited, but half as much more.

"The young man of twenty who will save twenty-seven and one-half cents a day in a savings bank paying four per cent compound interest, and keep up these payments or deposits till he is seventy years of age would have a fortune of \$29,000, which would pay interest of twenty-two dollars each week. This interest would be about ten times the amount saved each week."

"What is the plural of man, Johnny?" asked a teacher of a small pupil.

"Men," answered Johnny.

"Correct," said the teacher. "And what is the plural of child?"

"Twins" was the unexpected reply.

Many people take no care of their money till they have come nearly to the end of it, and others do the same with their time.—Goethe.

Artificial silk manufactured from wood pulp for which several kinds of California timber are suitable is used annually in this country to the amount of seven billion pounds. It is utilized principally in the manufacture of millinery, sweaters and hosiery.

Investigations made by the Forest Service of the wooden piling in wharves about San Francisco Bay have disclosed the fact that the damage done this season by the destructive pile borer, teredo, is apparently much less than usual.

Father—"Perry, why do you get so much mud on your shoes?"

Perry—"I can't keep out of the mud; it gets on so easy that it seems to me it should be easy to get off."

The forest service in California is co-operating with the University of California in the study of mill waste in the redwood belt that might be used in the manufacture of grain alcohol.

CERTIFICATE OF BUSINESS

Fictitious Firm Name

The undersigned does hereby certify that he is conducting a machinery business at 223 Marsh-Strong Building, Los Angeles, California, under the fictitious firm name of D. G. Bevis & Co., and that said firm is composed of the following persons, whose names and addresses are as follows, to-wit:

D. G. Bevis, 3737 Dalton Avenue, Los Angeles, California.

Witness my hand this 29th day of September, 1916.

D. G. BEVIS.
Filed Sept. 29, 1916.

H. J. LELANDE, Clerk.
By W. C. WATSON, Deputy.

STATE OF CALIFORNIA,

County of Los Angeles.

On this 29th day of September in the year nineteen hundred and sixteen, before me, Catherine A. Mitschler, a Notary Public in and for said County, residing therein, duly commissioned and sworn, personally appeared D. G. Bevis, known to me to be the person whose name is subscribed to the within instrument and acknowledged to me that he executed the same.

Witness my hand and official seal.
CATHERINE A. MITSCHLER,
Notary Public in and for said County and State of California.

ILLUMINATING NIAGARA FALLS

After years of experiment and the expenditure of thousands of dollars, a system of illumination has been installed at Niagara, whereby lights with an intensity of 50,000,000 candles render brilliant the American Falls, through the mist and spray which arises from them and the tumbling waters that dash through the rapids. It is to be permanent through all seasons.

Attempts to light the falls heretofore have failed because in all cases a system of searchlights was utilized and, powerful as these shafts of light may have been, they could do no more than become lost in a wall of water.

The method now used is known as the Davis system of flood lighting, whereby the beams are diffused through the water, spray, and mists, instead of upon them. In the place of the artificial glare of the arc light nitrogen incandescent lamps imbedded in reflecting hoods of most ingenious construction distribute the mellow beams over a great area, the nearest approach to sunlight devised by man.

One hundred lights, each of 500,000 candle power, are used in the work of rescuing American Falls and the upper rapids from darkness. They are so arranged, with the aid of a device, that at no place does the eye come in focus with the source of light.

Housed in the shelter of natural rocks, which in time will disappear beneath the covering of moss and ivy, there is nothing anywhere to distract the eye or affect the vision. These lights go through the water, not against or around it.

When you do not know where to turn, turn about and look yourself squarely in the face, with a view of finding what is really in you. Even in a few moments you will find enough to make you feel greater than any fate.

Exceptional opportunities will come back a second time and even a third time if you have made yourself worthy in the meantime. Opportunities demand more and more of you the longer you postpone your acceptance.
